

STATE OF ILLINOIS COVID-19 WEBSITE NOW LIVE!

Please forward a copy to the county board and applicable departments. Thank you!

In another effort to provide timely and accurate information to the public, Governor Pritzker announced the launch of a new website detailing the state's evolving response to COVID-19 and resources available to Illinois residents during this challenging time. [Coronavirus.illinois.gov](https://www.coronavirus.illinois.gov) centralizes the breaking updates from state government, prevention and preparation tips, frequently asked questions and resources from public health experts.

As a result, we will restructure our Coronavirus website page at [ilcounty.org](https://www.ilcounty.org) to focus more on access of Illinois county government emergency proclamations, courthouse procedures and local public health department briefings and resources.

We are being respectful at this time with our correspondence, knowing well that you may be receiving an abundance of communications from citizens, as well as various state and local departments that must take precedence. If we can be of any assistance, just email or call.

Again, we advise that you remain in contact with the Governor's office and applicable state agencies in addition to your public health department and emergency management personnel. Stay safe!
